

# AI SUPPORTED CHOICE OF SPECIALISTS THAT FIT YOUR COMPANY BEST

New technologies, such as Artificial Intelligence, have a major impact on how we operate our business.

Such solutions **reduce costs** associated with extensive screening processes and employee fit for a position, **allow to enhance people management.**

## Find the most suitable people for your needs.

Our system enables integration of information from **different sources and formats** to support evaluation of candidates, based on the **requirements defined by organizations.**

## HOW DO WE DO IT?

### Algo Analytic module

Analyzes information about the candidate from a variety of sources of information

### The Security module

Analyzes sensitive information about the candidate

### Artificial Intelligence module

Instantly identifies the most suitable candidates for a concrete position

**Our solution allows companies to choose the most suitable specialist easily and quickly from many candidates and analyze their qualities based on Artificial Intelligence and Big Data technologies.**
